Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1.-5. (cancelled)
- 6. (previously presented) An exercise unit comprising:
 - a frame;
 - a seat positioned on said frame;
 - a resistance engine attached to said frame and utilizing elastomere springs;
- an actuator attached to said resistance engine wherein said resistance engine provides a constant load to a user when said actuator is actuated, and wherein said actuator comprises a cable; and
 - a spiral pulley positioned between said resistance engine and said cable.
 - 7. (previously presented) An exercise unit comprising:
 - a frame;
 - a seat positioned on said frame;
 - a resistance engine attached to said frame and utilizing elastomere springs;
- an actuator attached to said resistance engine wherein said resistance engine

provides a constant load to a user when said actuator is actuated, and wherein said actuator comprises a cable;

means for modifying said increasing load into a constant load when a user actuates said resistance engine.

- 8. (original) An exercise unit as defined in claim 7, wherein said means comprises a spiral pulley.
 - 9. (original) An exercise unit comprising:
 - a frame;
 - a seat positioned on said frame;
 - means, attached to said frame, for providing a constant load to a user, said

Express Mail Label No. EV 759 037 455 US Appl. No. 09/802,835 Reply to Office action of March 7; 2006

means utilizing resilient bands;

an actuator attached to said means.

- 10. (original) An exercise unit as defined in claim 9, wherein: said means are located below said seat.
- 11. (original) An exercise unit as defined in claim 10, wherein: said frame defines a bench exercise unit.
- 12. (original) An exercise unit as defined in 9, wherein: said means includes a means for pre-loading.
- 13.-72. (cancelled)
- 73. (previously presented) An exercise unit comprising: a frame;
 - a seat positioned on said frame;
- a resistance engine attached to said frame and utilizing elastomere springs; an actuator attached to said resistance engine wherein said resistance engine provides a constant load to a user when said actuator is actuated, and wherein said actuator comprises a cable and a handle coupled to said cable.

74.-76. (cancelled)
